ADA v2.3

# GHOST IN THE MACHINE

**PHASE 1**

Tomorrow is the national hackathon. Meera's robot, ADA, was ready to win. At midnight, ADA's memory was pulled out and hidden somewhere on this campus. The CCTV shows nobody entered the lab. The only clue is a line glowing on ADA's screen. At every stop, ADA leaves a piece of her memory in an envelope. Keep every piece. You will need all of them at the end.

ADA > _

**ORYIZIB**

*"I read the alphabet in a mirror. My first is my last, and my last is my first."*

MEMORY: MISSING
